

DM1000™ Digital Mailing System with Intellilink®

Productivity Simplified

DM1000™ Digital Mailing System with Intellilink®

Pitney Bowes leading the way...

With mail in the UK increasing at a rate of 2.5% per annum and the liberalisation of the postal market under way – several operators have already been granted licenses for various postal sortation and delivery services – Pitney Bowes is leading the industry once again, with the revolutionary DM1000™ digital mailing system.

We have responded to the multi-carrier environment by developing our very own automated Internet connection called Intellilink®, which provides you with access to the postal services of your choice, automatic updates to postal rates and postage credits at the touch of a button.

In addition, the option of linking highly accurate weighing platforms to the systems or choosing the Pitney Bowes **Weigh-on-the-Way**™ technology ensures the correct postage every time. A single user interface control panel, with PC quality display and QWERTY keypad, makes these systems much easier to use than old style machines.

Streamlined technology helps the operator...

- **Intellilink® for instant updates** – an in-built, automated Internet connection provides instant on-line access to postal rates, software upgrades and value added postal services. **Intellilink®** is accessed via a standard phone line with all functions handled from the central control panel. It's so simple to use, no special skills or training.
- **No pre-sorting required** – the specially designed feeder processes true mixed mail: weight, size, open/close flap, eliminating the need to pre-sort mail.

- **Anti-skew mechanism** – every piece of mail is correctly aligned on the feed deck. This produces the perfect imprint on every mail piece, maintaining professionalism, reduces downtime involved with jamming and costly missed imprints.
- **Weigh-on-the-Way™** – our patented, fully integrated weighing platform processes mixed weight material up to 500g – automatically and in a single operation. Each piece is weighed, the proper rate is calculated and the postage is printed at speeds up to 130 letters per minute.
- **Differential weighing** – weighing platforms up to 35kg are available for heavier parcels providing accurate electronic weighing saving up to 20% on postage costs. In addition with our differential weighing technology, batches of mixed weight mail and parcels can be placed on the platform and the systems will calculate the value of each item when removed saving the operator a significant amount of time.

- **Open and closed flap sealing** – sorting is minimised by the DM1000™'s ability to handle mixed envelope configurations including combinations of closed flap, open flap and pre-sealed mail. The enhanced Jet-Spray sealing technology follows the contour of the envelope applying the correct amount of sealing solution while the pressure rollers ensure that the envelope is firmly sealed on exit.

- **Easy to use** – all controls are fully integrated on one clear control panel with user-friendly instructions to guide the operator through each stage of processing mail. The Control panel swivels so that it can be seen from operation angles. It easily detaches for connection to a phone line if required.

And it's better for business too...

- **Future proof solution** – the DM1000™ is packed with industry leading innovations ensuring your investment is kept current. The control panel will handle value added services and alternative postal services when launched by future postal carriers.
- **No delays in getting postage refills** – re-credit your meter with postage by simply pressing the button to activate the on-line connection to Pitney Bowes **POSTAGE...ONLINE**. Get up to 55 days free credit, post now pay later with **Purchase Power**.
- **Increased productivity** – innovative design features such as advanced detection sensors, auto-class select and auto-tape mode, maximize throughput, reduce stoppages and minimize maintenance requirements.
- **No fuss accounting** – the DM1000™ offers you virtually unlimited accounting options. Up to 300 accounts can be stored on the control panel allowing you to track your postage costs. In addition, Budget Manager and MeterNet™ accounting options increase your accounting flexibility allowing you to set budgets, monitor mail efficiency and even turn your mailroom into a profit centre.

- **Minimise costs** – the drop and feed roll tape dispenses labels that are cut to size, reducing supplies usage.

- **Razor sharp digital printing** – produce professional looking mail every time with the patented single inkjet head to give your mail that "open me" look.
- **Automatic advertising** – customise your messages by choosing from up to 10 slogans to promote your company and enhance the image of your mail.
- **Pre-date mail** – mail can be pre-dated up to 31 days in advance giving the mailroom enough time to prepare mailshots.

DM1000™ Specifications

Physical Dimensions (including drop stacker)

Length	1156mm
Depth	610mm
Height	480mm
Weight	62.5kg
Power Stacker	10.9kg
Drop Stacker	2.3kg

Electrical

100/240Vac, 60Hz, 0.65-0.3A

Speed

Up to 260 letters per minute (W-O-W off)

Up to 130 letters per minute (W-O-W on)

Material Sizes

Minimum Material Size 88mm x 127mm

Maximum Material Size 330mm x 381mm (without W-O-W)
330mm x 330mm (with W-O-W)

Material Thickness 19mm(max) to 0.2mm(min)

Envelope flap depth for sealing

101.6(max) to 19mm(min) (flaps open)

69.9(max) to 19mm(min) (flaps closed)

User Interface Control panel easily detaches to simplify connection to a phone line.

Standard operating features

- Auto-dating
- Multiple tapes (up to 50)
- Low postage warning
- High value protection
- Original value resetting
- Water level indicator
- Seal only/no seal modes
- Low ink warning
- Password security
- Weigh-on-the-Way™
- Printer/PC interface

Options

- Standard envelope advertisements
- PPI facilities
- Power stacker
- Weighing platforms –
 - 5kg platform
 - 12kg platform
 - 35kg platform
- Differential weighing on all platforms
- Accounting options – 100 or 300 accounts, Budget Manager or MeterNet™
